INTRODUCTION

Uniden is a world leader in telecommunications and wireless products offering the most superior and comprehensive range in the market today. Whether it is a sophisticated UHF Handheld or Mobile Transceiver, Scanning Receiver or Marine Radio, Uniden is innovative in its design and its performance is second to none. Uniden has a high quality product suitable for your personal or professional needs, developed and engineered for Australian and New Zealand conditions.

Uniden®

A·S·C· Technology
Advanced Signal Clarity

Only Uniden's UHF A.S.C. Technology uses an advanced microprocessor and surface mount components to provide the following outstanding benefits:

- Advanced Performance and Clear Reception
- Extended Transmission Range – longer transmission ranges
- Extended Operating Time – longer battery life due to the efficient high performance power module and a Long Life Super Switch on certain models
- Selectable Power Levels – from 40mW to 5 Watts Power depending on the model
- Designed and Engineered in Japan

	UNIDEN A.S.C. Technology	TYPICAL UHF Technology
Advanced Performance / Clear Reception	Yes	No
Extended Transmission Range	Yes	No
Extended Operating Time	Yes	No
Selectable Power Levels	Yes	No

MARINE

Durable enough to take anywhere and ideal for boating, marine, fisherman and commercial use, Uniden's Atlantis 250 offers outstanding performance in all conditions. This compact and powerful 5-watt unit has a world standard certified water resistant grading of JIS4 enabling it to withstand splashes of water from any direction. With extended range and crystal clear sound the Atlantis 250 provides the very best in marine communication.

atlantis 250
waterproof VHF

- Ergonomic Design Marine Radio
- 5 Watts Maximum TX Output Power
- Waterproof*
- Built for Rugged Australian and New Zealand Conditions
- Backlit Keypad and LCD Display
- Triple Watch Mode
- One Touch Emergency Channel 16
- Memory Scan
- Auto Battery Save
- Keypad Lock
- Includes 1 x Atlantis 250 VHF Marine Radio, 1 x Cradle and Mounting Screws, 1 x NiMH Rechargeable Battery Pack, 1 x Alkaline Battery Case , 1 x AC Adaptor, 1 x Cigarette Lighter Charger, 1 x Belt Clip, 1 x Wrist Strap

** Certified to meet the world standard JIS4 waterproof level. Being defined as having no harmful influence by receiving a splash of water from any direction.*

KEY

Operating time (in hours) based on 5% transmitting, 5% receiving and 90% waiting mode with low output power and alkaline batteries. If there are 2 numbers displayed (for eg. 38/26hrs) the first number is based on low output power and alkaline batteries and the second number is the operating time with the battery pack supplied.

Typical range in km (line of sight).

All specifications are subject to change without notice.

SCANNERS

Uniden Scanners listen to a wide range of communication being transmitted over public airways.
Uniden Scanners are specifically designed and developed for the Australian and New Zealand Market.

These receivers can offer:

- A simple way to monitor activity by the emergency services, CB radios, aeronautical channels and a lot more
- Access to alternative radio stations – such as ethnic or community radio

Ideal for many people including

- CB Enthusiasts
- Volunteer Services
- Community Groups
- Emergency Services
- Tow Truck Industry
- Security Services
- Journalists
- Aeronautical Enthusiasts
- Truck Drivers

CLOSE CALL™ RF CAPTURE TECHNOLOGY

Allows you to immediately lock onto nearby transmissions. If someone transmits nearby, the scanner immediately detects and tunes in to the transmission. Ideal for use at events when the frequency being used is unknown.

GLOSSARY

- A.S.C Technology: Advanced Signal Clarity Technology ensures optimum sound clarity.
- APCO 25: Monitor any un-encrypted APCO 25 phase C4FM and CQPSK system, including Motorola systems, using 3600 or 9600 bps control channels.
- Auto Battery Save: Automatically saves and conserves power when not in use.
- Auto Search and Store: Search a given band of frequencies and store the active channels into specific channel locations.
- Auto Squelch: Automatically blocks the unwanted low hissing noise allowing only strong incoming signals.
- Band: A designated group of frequencies.
- Bank: A bank of memories or channels that aids sorting and faster scanning.
- Bearcat Engine: Allows the unit to scan UHF CB channels, AM CB channels and user programmable channels at the same time. Dual watch, open scan and group scan give seamless communication across the channels and bands.
- Busy Channel Lockout: Disables your transmitter while activity is detected on the channel.
- Channels: The number of transmission frequencies available to transmit or receive messages.
- D+ Booster (Extreme Distance Booster): Uses precision matched antennas to deliver superior range and enhance battery efficiencies compared to standard UHF systems.
- Data Skip: Allows the scanner to skip unwanted data transmissions and reduces birdies.
- Digital Coded Squelch (DCS): Allows you to choose from 104 alternative digital codes that can be sent with your transmission. The digital code is recognized by the selected receivers enabling them to receive the transmission. Receivers that do not recognize the digital code remain silent therefore blocking out unwanted conversations.
- DIN Size: The correct size for all in-dash vehicle installations.
- Dual Listening Circuitry: Allows you to listen to your UHF and Scanner Channels without having to switch between Scanner and UHF mode.
- Dual Watch: Allows you to monitor the priority channel for activity every two seconds while monitoring another UHF or AM CB channel at the same time.
- Frequency Skip: Allows you to skip frequencies in Band Search, Service Search and Close Call Search if the frequency is not a preferred one.
- Interference Eliminator (CTCSS): Allows you to only hear transmissions using the same code on the same channel, effectively blocking out unwanted conversations.
- Instant Channel Programmable: Allows you to select the channel you want to set as your priority channel.
- Key Touch Tone: Alerts you with a tone after a key is pushed.
- Keypad Lock: Allows keys to be frozen.
- LCD: Liquid Crystal Display.
- Long Life Super Switch: Select between high, medium and low RF output power to extend your battery power supply.
- Manual Channel Access: Allows you to go directly to a channel without stepping through other channels.
- Memory Channel Scan: Allows you to scan all channels saved in memory.
- Monitor: Listen to weak signals normally muted by the automatic squelch unit.
- Memory Backup: Keeps a backup in the memory of previously programmed frequencies and settings once power is turned off.
- Multi-Site Trunking: Lets you share system channels across multiple sites allowing you to efficiently use the scanners memory and more easily select sites to monitor.
- One Touch Emergency Channel 16: At the touch of a button you have access to emergency channel 16 or channel 9.
- Open Scan: Scans all channels and locks on active channels.
- Priority Channel Scan: Allows you to monitor the priority channel while scanning other channels.
- Priority Watch: One Channel per bank can be designated as a priority channel. Once activated, the scanner will regularly monitor the selected channel and automatically return upon sensing activity.
- Range Extender (Duplex) Capability: Allows the unit to operate via a local repeater station, if available, which transmits your signal over a wider area. Up to an extra 30-100km depending on location, height and availability of local repeater station.
- Remote or In-Dash Control Head: Allows you to mount the front control of the radio in a convenient location whilst fixing the body of the unit in a separate location.
- Repeater: A high power transceiver mounted on high ground to give maximum coverage, limited to 21 Watts EIRP, which retransmits the original signal to give extended range.
- Roger Beep: Confirmation tone indicating the completion of your transmission.
- Search: To scan between designated upper and lower frequency limits for activity.
- SELCALL: Selective Calling or Tone Calling allows the user to send a series of tones that equate to a 5 or 6 digit number (like a telephone number) to selectively call a similarly equipped person.
- Splashproof: Certified to meet the standard JIS2. Being defined as having no harmful influence by drip of water falling from the range covering 15° from perpendicular.
- Transceiver: Abbreviation for Transmitter/Receiver, or Two-Way Radio.
- Trunktracker IV - (Motorola APCO 25 Digital®, Motorola®, EDACS®, LTR®). Search for and monitor all the groups within a specific trunked digital or analogue system. Lockout unwanted groups during the search and save other groups to scan lists.
- VOX Built-In: Handsfree operation is possible with Voice Activated Circuitry and optional headset or speaker microphone.
- Waterproof: Certified to meet the world standard JIS4 waterproof level. Being defined as having no harmful influence by receiving splash of water from any direction.
